You will then be asked to resynchronize the Card By following the normal login process, a new window will appear that requests you to enter two consecutive Security Codes in order to resynchronize with the verification system.. If yes, you may try to set it higher step by step, to see which connection speed works best with your specific system.. There are a few things you should check: • Do you meet the? • Are all checks green in the 'Your Computer' status on the Login Window? • Try lowering your Connection setting in 'Options' on the Entropia Universe Login Window.. Even though you have ADSL or an even better connection, try setting the connection speed to 56 kbit to check if that improves your situation.. Wireless solutions themselves are not safe environments Unless properly encrypted, these solutions can jeopardize your account information amongst other things. [Model 2 Roms](#)

If you fail to synchronize your Gold Card, please generate two consecutive Security Codes with your Gold Card and add these in a Support Case sent to the Entropia Support.. • Open these ports in your firewall: • 20, 21 (TCP Outbound) - Additional TCP Port outbound for passive mode FTP • 80 (Outbound) • 30584 (UDP inbound/outbound) • 30583 (TCP Outbound) • 554 (TCP Inbound) • If you have a router, make sure the router configuration has Ports 20,21, 30584 and 30583 forwarded to your computer.. Also, make sure you have the latest firmware for your wireless station/router Due to security reasons, you only have three attempts before your Gold Card becomes unsynchronized with the verification system.. The Entropia Universe is very packet intense and many WLAN device manufacturers fail to meet the requirements for running such traffic wireless.. If you are experiencing issues with your wireless LAN, we can only advise you to do an overview and see that certain criteria like bandwidth and latency are met.
